

EXHIBIT A4: “White Knuckling” Evidence - CPS Records

Source: DCYF PRR-349 Records - Professional CPS Documentation

Date: 2025-04-08 (CPS Intake)

Case: Washington Medical Commission Complaint - Anjali D’Souza

KEY EVIDENCE: “White Knuckling” Statement

From CPS Report C25010391 (Official Government Record):

“Elora told the father that on one occasion her mother grabbed a knife, and she was squeezing the knife so hard that she was ‘white knuckling’ the knife.”

(Line 73)

SIGNIFICANCE FOR WMC COMPLAINT

Professional Analysis Required:

1. **Age-Inappropriate Language:** “White knuckling” is sophisticated adult terminology beyond 10-year-old vocabulary
2. **Therapeutic Influence:** This language suggests adult coaching or therapeutic interpretation
3. **Professional Standards Violation:** Therapist allowed/enabled inappropriate statement formation

Developmental Concerns:

- 10-year-old children typically use concrete, descriptive language
 - Metaphorical expressions like “white knuckling” emerge in adolescence
 - Pattern suggests adult influence in statement formation
-

SUPPORTING DOCUMENTATION

Cross-References: - CPS Report Case C25010391 (Police Report #36-42 in premium package) - DCYF Investigation Records (181 pages total) - Professional linguistic analysis available in legal collection

Professional Resources: - Child development language standards - Forensic interview protocols - Age-appropriate vocabulary research
